

Emergency Responder Pack

Emergency Responder Pack is specifically designed for initial care of the non-serious, critically ill or injured patient.

The ER pack is most commonly used for ambulance, search and rescue, high rise rescue, helicopter or as a personal medical kit. In addition, the ER pack is an excellent specialty kit for trauma, pediatric, neonatal, burn, obstetrical, cardiac or respiratory patients.

ER Features:

- 4 interior color coded vinyl window pockets
- 3 medium exterior pockets
- 1 large hidden pocket
- 3 small vinyl window interior base pockets

The placement and closure of these pockets is specially designed to reduce the likelihood of equipment loss. The color coding and clear vinyl front pockets allow rapid location access of equipment and supplies as well as quick re-stocking. The D rings on the back of the pack allow shoulder straps to be easily attached. The ladder frame of the pack can also serve as a splint when needed.

Dimensions: 11" x 12" x 5"

*Does not include shoulder straps. Shoulder straps sold separately.
