

O2 Supreme

Our largest and most comprehensive O2 pack ideal for ALS response from both ambulance and fire apparatus.

The O2 Supreme features:

Designed to accommodate up to a "D" sized tank, multiple sizes of BVM's, intubation, IO, pulse oximetry, and all other initial assessment and wound treatment supplies.

Two large exterior pockets for additional storage of initial assessment, IO, or intubation equipment.

Interior

- Padded base for protected storage of O2 tank with nylon straps and side release buckles to ensure secure storage
- Nine clear vinyl interior zippered pouches with high visibility pull tabs

Exterior

- Two exterior handles that allows for easy removal from the cabinet and multiple carrying options
- High visibility zipper pulls for all exterior compartments and pockets.

Clear vinyl adjustable pockets in the base of the pack with clear vinyl tabs for easy marking and identification of all equipment.

Tuck-Away back pack straps for hands free carrying.
