

# Thomas® Handles

Reduces Injuries and Discomfort  
for EMS Professionals

For EMS professionals most back injuries occur while lifting. The Thomas Handle is designed to reduce the amount of bending when lifting a backboard by adding approximately 12 inches to the lifting point, thus lessening back strain, eliminating awkward lifting angles, and minimizing abrasions on the hands and knuckles.

## Key Features of the Thomas Handles:

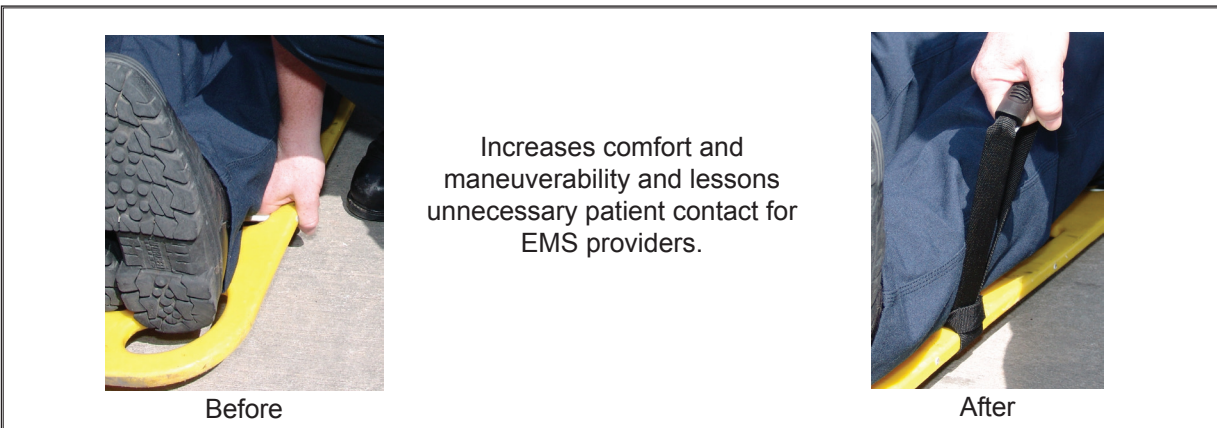

- Attach to any backboard
- Durable 1" webbing and a rubberized, pre-molded handle with a strong non-slip grip
- Adjustable to fit EMS professionals of all sizes

The Thomas handles attach easily and quickly to any handle on the backboard. Handles are also adjustable to fit EMS professionals of all sizes.

Durable 1" Webbing and a rubberized, pre-molded handle form a strong non-slip grip.

Increases comfort and maneuverability and lessens unnecessary patient contact for EMS providers.
